

# X60 M5 Basic

Art. No. 80.50.403

## Waste separation system for pre-existing rails

This waste system for cabinets with a width of 600 mm is specially designed for drawer pullouts with a lower height. However, this is no reason to do without integrated waste separation options. The four additional bins with a volume of 8, 5, 1 and 0.5 litres can be used in different ways for storing or collecting recyclables. The core of the set is the 35-litre main container for the waste bag. This version of the X-LINE is rounded off with a Basic drawer.

- ▶ Easier waste bag clamping with four movable bag clamps.
- ▶ Fits all standard drawer chests with a depth of 400-500 mm, thanks to the adjustable ratchet system.
- ▶ Basic drawer as additional storage space.
