

Waste separation container X55 M17

Art. No. 80.51.305

System for pre-existing rails

For households that prefer waste collection with 17-litre waste bags, this bin combination is the right choice. The main bin with a capacity of only 20 litres allows optimal collection of smaller quantities of waste and also more space for recyclables. Two 10-litre additional bins offer space for organic waste, coffee capsules and dishwasher tablets, also for cleaning utensils. The bin combination is designed for low kitchen base units with a cabinet width of 550 mm.
