

X55 L5 Basic

Art. No. 80.50.301

Waste separation system for pre-existing rails

In this set, the 40 litre main container is supplemented with four additional containers. Smaller recycling items such as coffee capsules can be collected in the containers, each with a volume of four litres. Alternatively, the additional storage space can also be used for dishwashing tabs or batteries. The containers can be positioned either to left or right of the main container. The set also includes a Basic drawer, which provides additional storage space. This waste system is designed for a cabinet width of 550 mm.

- ▶ Easier waste bag clamping with four movable bag clamps.
- ▶ Fills refuse bags to the brim. Switzerland's official 35 or 17 litre bags are fully utilized.
- ▶ Fits all standard drawer chests with a depth of 400-500 mm, thanks to the adjustable ratchet system.
- ▶ Basic drawer as additional storage space.
