

X60 M17 Premium

Art. No. 80.50.410

Waste separation system for pre-existing rails

Smaller quantities of waste can often be collected more sensibly with 17-litre waste bags. This X-LINE model therefore has a smaller 20-litre main bin to simplify waste disposal in smaller waste bags for single or small households and companies with seminar rooms, for example. The two additional bins with a volume of 10 litres offer enough space for recyclables or storage space for cleaning utensils. Complemented by the premium drawer with two additional trays, maximum convenience and storage space in the kitchen base cabinet is guaranteed. This model is designed for cabinets with a width of 600 mm and a lower installation height.

- ▶ X-LINE waste system for 600 mm cabinet width and lower kitchen base units.
- ▶ Optimised for 17-litre waste bags and the collection of smaller waste quantities.
- ▶ Additional storage space and room for various recyclables in the two 10-litre additional bins.
- ▶ More convenience and order thanks to the premium drawer with full-extension runner.
