

X90 L6 Basic

Art. No. 80.50.601

Waste separation system for pre-existing rails

The widest X-LINE waste system is designed for cabinets with a width of 900 mm. The heart of the set is the 40-litre main container for the waste bag. Five additional bins with a capacity of up to 18 litres offer plenty of space for storing kitchen utensils and separating recyclables. With this system, recycling is possible directly in the kitchen. Thanks to the well thought-out container-in-container principle, all containers are easily accessible from above. Simple and uncomplicated handling is thus guaranteed, making the collection of recyclables child's play. The set is rounded off with a sturdy steel lid.

- ▶ Easier waste bag clamping with four movable bag clamps.
- ▶ Fills refuse bags to the brim. Switzerland's official 35 or 17 litre bags are fully utilized.
- ▶ Four additional containers with up to 18 litres capacity for recycling items and storage.
- ▶ Metal lid to cover the containers for more stability.
