

# Waste separation container X60 M5

Art. No. 80.51.402

## System for pre-existing rails

This container set was specially designed for reduced height drawer chests with a cabinet width of 600 mm. The core of this container combination is the 35-litre main waste container for official bags. The four additional containers with a capacity of 8, 5, 1 and 0.5 litres allow almost unlimited possibilities for waste separation and storage despite a lower installation height.
